### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 23 July 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

1. Claims 1-14 are pending.

***Information Disclosure Statement***

2. The information disclosure statement filed 04 Sept 2003 (09/04/2003) fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because the document has no English translation. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2137

4. Claim 14 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 14 recites the limitation "the information templates" in line 2. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-6, 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Piosenka et al (U.S. 4,993,068).

As per claims 1 and 8, Piosenka et al discloses constructing a first information packet which comprises identity credence information and biometrics information; selecting an asymmetric encryption, and digitally ciphering said first information packet with a private key to generate a second

Art Unit: 2137

information packet; and storing said second information packet generated by ciphering into a medium to produce said identity credence (see column 10 line 65 through column 11 line 9 and Figure 3A).

As per claims 2 and 9, Piosenka et al discloses the step of digitally ciphering said first information packet with said private key comprises the step of encrypting said first information packet with said private key to generate said second information packet, and wherein said second information packet includes the encrypted first information packet (see column 10 line 65 through column 11 line 9 and Figure 3A).

As per claims 3 and 10, Piosenka et al discloses the step of digitally ciphering said first information packet with said private key comprises the step of performing digital signature on said first information packet with said private key to generate said second information packet, and wherein said second information packet includes both said first information packet and said digital signature (see column 7 lines 12-14).

As per claims 4 and 11, Piosenka et al discloses the biometrics information is fingerprint information, eye iris information, eyeground information, or palm print information (see column 3 lines 44-48).

Art Unit: 2137

As per claims 5 and 12, Piosenka et al discloses the asymmetric encryption is RSA algorithm, Pohlig-Hellman algorithm, Rabin algorithm, ElGamal algorithm, or PGP algorithm (see column 5 lines 60-61).

As per claims 6 and 13, Piosenka et al discloses the medium is an IC card, a disk, or a network database (see column 6 lines 40-48).

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 7 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Piosenka et al as applied to claims 1 and 8 above, and further in view of Gullman et al (U.S. 5,280,527).

As per claims 7 and 14, Piosenka et al fails to disclose the biometrics information includes a plurality of information templates.

Art Unit: 2137

However, Gullman et al teaches the use of a plurality of information templates (see column 5 lines 57-65).

At the time of the invention it would have been obvious to a person of ordinary skill in the art to use Gullman et al's biometric information templates in the biometric storing method of Piosenka et al.

Motivation to do so would have been to use one or more of the templates to identify a person (see Gullman et al column 5 lines 57-65).

### **Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Pyzocha whose telephone number is (571) 272-3875. The examiner can normally be reached on 7:00am - 4:30pm first Fridays of the bi-week off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Caldwell can be reached on (571) 272-3868. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
